

Everything a ship needs

At home in the ports around the world

In 1981 the company Uwe Kloska GmbH was founded as a technical supplier in Bremen. Today it is still the company group's headquarter. Over the course of several years other companies joined the group, each completing the service portfolio in a different way.

In the beginning of the 90s the Kloska Group started to expand considerably. It was always a strategic target to be present at all important maritime locations in Germany. Following the requirements of the growing ship supply market, the group established new branches and cooperation in Belgium, the Netherlands, China, Russia, Poland, Spain, Brazil, Singapore, South Africa and the United Arab Emirates.

Nowadays, the group's business activities range from technical supplies for the shipping, on-/offshore services, construction, handicraft and general industry to engine spare parts combined with in-house repair shops, conveyor technology and hydraulics. The group also established catering services and supplies general provisions and stores to ferries, cargo vessels, cruise ships, research vessels and research stations.

We extend our standard business fields by a large number of attractive specialized services. The vast range of products at our facilities includes approximately 130.000 different items.

Our standard activities include delivery on short notice, 24-hours service and just-in-time delivery as well as a professional, individual and personal assistance on site. It is our highest priority to establish a long lasting customer relationship on a fair and solid basis.

Our experienced team is used to thinking customer orientated. We benefit from our flexibility and creativity in order to meet all the frequently changing demands of the market.

Based on the achieved success and with the support of our employees, we are eager to lead the Kloska Group into an even more prosperous future. We benefit from our experience, will be a reliable partner for our customers and will work continuously on our improvement.

Uwe Kloska and Nadine Kloska

Technical Ship Supply

We support the shipping industry with a wide scope of services and a quality standard that enjoys worldwide recognition. Our catalog "Everything a ship needs" includes the most important consumables for the technical ship supply. We support our partners with all necessary electronical or hardcopy catalogue information, general or individualized.

- Initial supplies for new buildings
- Deck stores
- Engine stores
- Cabin and galley stores, stationary
- Personal and safety protection
- Electrical stores
- Mooring ropes
- verope® special crane wire ropes
- Safety equipment
- Fire fighting and lifesaving equipment
- High pressure cleaning equipment

UKTA supply management, worldwide:

We are trying to improve the efficiency of our services by taking advantage of purchasing power and lowering the cost of delivery.

Our supply chain covers the planning and management of all activities involved in sourcing, procurement and logistics management for consumable stores and provisions. We are focusing to reduce unnecessary costs and removing bottlenecks and increasing efficiency.

Our well organized supply management process is one key to your performance as part of the ships' operating costs.

Contact Technical Ship Supply & Maritime Store Consumable Catering:
shipsupply@kloska.com | +49 (0) 173 - 2363062

Consumable Catering

Our catering catalogue with more than 6.500 standardized items is the key to performing efficiently between vessel, procurement, caterer and our worldwide supplier network. We support our partner with digital data as well as hard-copy catalogues.

Our special designed catering software ensures the safe and efficient supply of consumer products at contracted budgets. Your administration expense will be reduced considerably as a result. Our online-dashboard supports you with relevant information's about all our supplies. Together with our detailed reporting we ensure a transparent communication and co-operation with our customers.

Supplies can be covered at all important ports via own Kloska facilities, Kloska Partner or strong supplier network.

Kloska Maritime Stores Catering:

- Individualized catalog and reduced stores consumable item list for all parties.
- Worldwide on-schedule deliveries to assist operations on board
- Mutual item and service standard via Kloska Network
- Our strong supply chain ensures intensive cost reductions

Provisions & Bonded Stores

Kloska is a worldwide supplier of provisions and bonded stores for the maritime industry, large construction sites, remote sites, peace-keeping forces and the offshore industry.

Due to our excellent procurement we offer an exceptionally high-quality choice of foods, beverages and fresh produce. We show presence- directly at the Wholesale Market in Hamburg - by running our own office and warehouse space.

Our standard range of products includes:

- Fresh, frozen and dry provisions
- Beverages

In addition, we offer beers, spirits, cigarettes, confectionary and toiletries.

Provisions Catering

The Kloska-Group takes care of the daily provisions supply for over 900 vessels worldwide as sustainable caterer with IT support system. The experience of our well trained personnel and a huge network of reliable partners and Kloska-owned facilities around the world is the base for a close connected and professional management of provisions catering.

The in-house developed catering software gives the possibility to monitor and control the budget of each vessel allowing the catering team to focus on the quality of the provisions and suppliers overseas. This leads to an improvement of the catering operation and budgets on board.

Advantages for the customer:

- all provisions orders to be managed/arranged by the catering department
- budget monitoring and control of volumes
- reducing administrative workload
- detailed reporting and statistics

For the calculation and planning of a provisions order many factors have to be considered, such as type of vessel, trading area and the nationalities of the crew on board.

By giving access to our on-line platform our clients are able to monitor all operative activities including budget situation of the fleet and each vessel.

Ropes & Mooring Ropes

The Kloska Group offers a wide range of ropes and mooring ropes, with UKTA being our home brand for the top-quality products.

The UKTA marine series represents the high-quality mooring rope brand and is manufactured in cooperation with the Gleistein Ropes company in Bremen, Germany. This type of rope stands out due to its enormous working load capability, abrasion strength, and ideal handling characteristics. With these mooring ropes we guarantee to supply the top quality at an excellent cost-benefit ratio.

Our range of products includes a variety of items designed to meet individual requirements - from long-lasting mooring lines, through complete tug systems and heavy offshore applications, to customized solutions.

Special Wire Ropes from our partner verope AG

Since more than 15 years, the special wire rope program from the Swiss manufacturer verope AG has demonstrated its excellent performance and reliability in various demanding maritime crane applications worldwide.

These high-quality, very competitively priced special wire ropes, have been subjected to severe testing by leading deck crane and offshore crane manufacturers. Today, the verope special wire rope is the most successful used original equipment within the maritime industry.

The successful business relationship between verope AG and Kloska Group in the field of special wire ropes has been maintained and continuously strengthened since 2007.

The verope special wire ropes are readily available and at immediate disposal in Germany, Shanghai, Singapore and Houston. As a result, we are glad to offer a major competitive advantage to our customers as their delivery on board can be guaranteed on short notice and in the most logistically cost-effective way.

Our experts, who have the technical know-how, are glad to assist our clients with selecting the right wire ropes while providing solutions to diversity of problems.

On- / Offshore Equipment & Service

In Germany, wind power has now become the most important form of regenerative energies. As a result, we have adjusted the range of our products and services to meet the needs of manufacturers, suppliers, and service companies operating in the wind power segment.

We are suppliers for:

- Manufacturers of wind turbines
- Manufacturers of rotor blades
- Service and installation companies
- Builders of foundation structures, etc.

We offer an extensive assortment of products and services - from supplying tools and work protection wear, through delivering specialized solutions for hydraulics and lifting technology, to furnishing the offshore with PPE.

In addition, our offer also includes the performing of PPE inspection services. With regard to supplying offshore projects with provisions and catering services, our service portfolio offers individual solutions. Due to the increase of imposed requirements, a capable team was set up to provide individual and on-site support services to respond to customers' requests.

Offshore Catering & Housekeeping Services

Our offer of providing services to offshore platforms and special purpose vessels entails a complete peace-of-mind package. Our staff doesn't only take care of the provisioning at sea, but also accommodates housekeeping services to make your workplace as comfortable as possible while being away from home. Every day our qualified cooks prepare fresh and nutritious meals – from home-style cooking to preparing international cuisines – always offering something to soothe all tastes.

We deliver all-in-one service solutions – from supplying provisions, taking care of the catering, to providing cleaning and laundry services.

If requested, we'll work out together with you the best available solution and customize it to your specific or any other needs.

Kloska Group operates in compliance with the HACCP guidelines, and is certified in accordance with ISO 22000. The applicable guidelines applied on platforms and vessels are regularly subject to inspection on site, in order to ensure their compliance.

Maritime Environmental Protection System

Customized solutions for on-board treatment of dry and wet waste, black- and greywater, bilge and ballast water. One stop solution including engineering, construction, implementation, and commissioning.

Our product line includes:

- Bilge water separator
- Biological sewage treatment plant
- Black water vacuum systems
- Food waste processing with integrated vacuum transport systems
- Garbage cold stores
- Grease separator
- Membrane Bio Reactor sewage treatment plants
- Recycling components for:
 - Tin compactors
 - Glass crushers
 - Plastic bottle crushers
 - Bag compactors for wet kitchen wastes
 - Bale compactors for plastic, paper and cardboard
- USCG approved ballast water treatment systems

Biological Sewage Treatment Plant

The OSC-COMPACT plant is a membrane-based biological sewage treatment plant and is certified in compliance with the MEPC. 227(64). The OSC-EASY plant is a biological sewage treatment plant and is also certified in compliance with the MEPC. 227(64).

Bilge Water Separator

The bilge water separator is a three-level separation system for water and oil and is available for the capacity of 0.25m³/h–5.0m³/h. The maximum oil content at the discharge is <5ppm and is permanently monitored and shown on a screen.

The plants have been type-tested in compliance with the MEPC. 107(49).

Contact Maritime Environmental Protection System: maritimesystem@kloska.com | +49 (0) 173 - 2449146

Ballast Water Treatment

The USCG approved BIO-SEA ballast water plants are available in sizes from 55–1400 m³/h. The BIO-SEA systems are based on a filtration and UV-treatment process.

Food Waste Handling System

In sizes available for for smaller yachts and even up to the largest cruise vessels. Based on environment friendly vacuum transport technology with centralized and de-centralized macerating technology.

Cruise Line Supply & Logistics

Kloska Group has been a valuable partner for companies in the cruise industry for years. Our extensive storage space in the proximity of the port of Hamburg, together with our own office at Hamburg`s fresh produce market, guarantees not only the services of a general supplier, but also the special logistics services specially designed for this segment.

With our own custom department and bonded licenses we have the ability to dispatch and handle all kind of goods in short terms.

- Food
- Beverages
- Fresh produce (Modified atmosphere)
- Technical supply
- Cabin stores
- Consumables and hotel supplies
- Hazard goods
- Landing goods
- Logistics
- Custom

Our logistics chain with optimized processes includes procurement and warehousing, as much as the worldwide timely delivery of a wide range of products. In addition to processing the customs documents and clearance, it also involves the handling and temporary storage of landing goods and hazard goods as well as purchasing and commissioning of complete goods assortments.
