

COVID 19

Preventive Measures Kloska Group

In order to protect our employees, customers and suppliers the Kloska Group has installed extensive measures to prevent the uncontrolled spread of the Corona virus COVID 19 also vital to safeguard our business operations.

Hygiene & Infection Protection

All employees are urged to comply with the hygiene measures stipulated by the Robert Koch Institute. Sufficient dosing units with disinfectant, disposable gloves and masks are available in all KLOSKA branches.

Minimize Contact

In all branches of the KLOSKA Group zones and working areas have been sealed off and shift operation has been implemented where possible to minimize personal contact. All branches are to enable their employees to work from home where possible. Employees are to keep a safe distance to their colleagues of minimum 1,5 meters at all times.

Meetings / Business trips

Business trips to risk areas according to the Robert Koch Institute are forbidden. Business trips to other areas are to be postponed, if this is not possible the consent of the management is compulsory.

Meetings with customers, suppliers and internal meetings are to be cancelled or postponed until further notice.

Supplies, Service, Repairs & Installations

Visits onboard are only permitted under stringent restrictions and always in accordance with the Shipping Companies and Ship Managers.

All technicians, service technicians, drivers and water clerks must be equipped with protective hygiene equipment. Our drivers are urged not to hand over the goods within the buildings of our customers. A safe drop-off point must be agreed upon with the customer.

Sales representatives are to reduce customer visit to a minimum.
