

# MARITIME ENVIRONMENT PROTECTION SYSTEMS

Holding + Buffering | Cooling | Stirring

## Dried Bio Waste Silo

The Ocean Clean Dried Bio Waste Silo will store and buffer all kinds of dried waste. It is designed to perfectly suit its purpose so it is sized according to the needs of the ship's food waste system. Safe operation is ensured by sturdy sensors, valves and motor. Dried food waste will be rotated to prevent clogging and spontaneous combustion (double-walled for active water cooling and fire prevention).

A custom-made design will be created for each individual project.
